48-core terminal fiber splicing tray

Overview

The 48-Fiber transparent fusion splice tray is ideal for fusion splicing single fiber. The see through cover and mylar insert enable easy viewing when visual fault locator (VFL) testing and verification is performed to ensure cable continuity and determine pass or failure of splicing. Built with an IP65-rated enclosure, this terminal box is designed to withstand harsh environments, making it suitable. Stackable with or without pigtail extension for use in patch panels, wall boxes and in-line closures Flip with hinged tail for use in dome closures Hinged mounting allows full and easy access to each splice tray at any time Maximum capacity of 24 single-fibre fusion splices 1200 mm long fibre slack. The 48-Fiber transparent fusion splice tray is ideal for fusion splicing single fiber. Features tool-less access, IEC/TIA/EIA compliance, and optimized bend radius control for B2B network deployments.

Multi-function Splice Trays (MFT) 2 splice tray, 48 F, crimp splice ...

The trays are engineered for use with both loose tube and tight-buffered optical cable designs. Their generous size prevents induced attenuation due to fiber bending.

FST-48S-234 | 48-Fiber High-Density Splice Tray with 4 Splice Modules

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

FST-48S-234 is a professional high-density splice tray supporting up to 48 fibers. Features 4 independent splice modules (12 FO each) for organized large-scale fiber management.

48/Cores Optic Components Fiber Optical Splice Tray

48/Cores Optic Components Fiber Optical Splice Tray for FTTH/FTTX Box US$0.50-2.00 1 Piece (MOQ) Port: Shenzhen, China

48 Cores FTTH Fiber optic floor splice box

The 48 Cores FTTH Fiber optic floor splice box is designed for providing full splice and perfect fiber management. With the 8 drop cable ports on bottom and 8 drop cable ports on top, the fiber floor

48-Fiber Horizontal Outdoor Splice Closure – 6 Ports

This closure supports up to 48 fiber splices across 4 splice trays and is compatible with 48 SC simplex or LC duplex adapters (with flange), enabling seamless fiber

48-Fiber Horizontal Outdoor Splice Closure – 6 Ports

The HTB-119-48SC horizontal splice closure is engineered for high-performance fiber distribution, featuring 6 ports arranged as 3 on each side. It supports a

48 Cores Fiber Trays

A 48-core fiber splice tray is a specialized component in fiber optic network infrastructure designed to accommodate, organize, and protect up to 48 individual optical fibers within a single enclosure.

Splice Tray | Fiber Tray | FTTX Solutions | LongXing

The splice tray ST series manufactured by LongXing are used in optical distribution frame, terminal box, and splice closures for the capacity of 8/12/24 cores.

Fiber Cable Mechanical Splicing Guide Using Fiber

Learn how to perform mechanical fiber cable splicing inside fiber enclosures using fiber splice trays. This step-by-step guide covers fiber
