10kV Small Busbar Commissioning

Overview

Insulate the cast resin busbar trunking system from the connections to transformers, switches, meters, and so on. Check all suspensions. The purpose of this method statement is to outline the sequence and method of Testing & Commissioning of Bus Bar Trunking system. Following tools and equipment shall be arranged before the activity. Earth tester Multimeter I Continuity tester Megger Tester Technician's tools Calibration. 1) One package contains 2 busbar supports including inlay parts for bar thickness 5 mm and lateral finger-safe covers. Starting from the wiring of low voltage command and signal cables, filling CBs with SF6 gas, special attention is given to testing and commissioning checks (visual, mechanical, electrical, operational and insulation resistance). Through the guidelines contained herein so as to ensure that the job execution complies with the project requirements and serves the.
