12-core central tube optical cable

Overview

Because there are only 12 colors of optical fibers, the national standard (also international standard) central bundle tube optical cable can only have 12 cores at most. The central tube cable construction, by isolating the fibers from installations and environmental rigors, provides stable and. Universal OFC CLT (jelly filled): GLASS YARNS + CST + LSZH with 1 Tube of Ø3. (Oil resistant) Universal (Indoor/Outdoor) optical fiber Central Loose Tube (jelly filled tube) cable with glass yarns as strength member, Corrugated Steel Tape (Full Rodent Protected) armor and. Experience reliable and high-performance outdoor fiber optic connectivity with GYXTW Outdoor Central Tube Cable. Fiber Core. This cable can be used for LAN and WAN backbones, telecom access lines, fibre to business and fibre to the building or the home connections. It is equally suited for installation in ducts and on trays. This cable features a high tensile strength and a degree of rodent protection effective in many. The central Al-covered steel tube is surrounded by single or double layers of aluminum clad steel wires (ACS) or mix ACS wires and aluminum alloy wires. Al-covered Stainless Steel tube design increases the cross section of AL, to reach a better fault current and lightning resistance performance. 12 Core OPGW Cable is a dual functioning cable performing the duties of a ground wire and also providing a patch for the transmission of voice, video or data signals.
