4-pin optocoupler model

Overview

The VOM619A series has an infrared emitting diode, which is optically coupled to a phototransistor detector, and is incorporated in a green 4-pin small outline package.

Article Content

ANO007 | Understanding Phototransistor Optocouplers

In order to design a functionally robust and reliable application with optocouplers, it is essential to understand not only the device''s main parameters and parasitic elements, but also their tolerances

Optocoupler, Phototransistor Output, 4 Pin SOP,

The VOM619A series has an infrared emitting diode, which is optically coupled to a phototransistor detector, and is incorporated in a green 4-pin small outline package.

FOD816 Series 4-Pin Phototransistor Optocouplers

The FOD816 consists of two gallium arsenide infrared emitting diodes, connected in inverse parallel, driving a silicon photodar-lington output in a 4-pin dual in-line package.

Complete Guide to Optocoupler Datasheet 4-Pin

In this section, we delve into the intricacies of deciphering essential information from optocoupler documentation, focusing particularly on 4-pin configurations.

4 PIN DIP PHOTOTRANSISTOR PHOTOCOUPLER EL816 Series

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

Description The EL816 series of devices each consist of an infrared emitting diodes, optically coupled to a phototransistor detector. They are packaged in a 4-pin DIP package and available in wide-lead

4-Pin Dip Phototransistor Output Optocoupler

FOD817C300 4-Pin Dip Phototransistor Output Optocoupler DESCRIPTION. The FOD817 Series consists of a gallium arsenide infrared emitting diode driving a

ANO007 | Understanding Phototransistor Optocouplers

OPERATION A phototransistor optocoupler is formed by an infrared light emitter device (IR-LED) (Gallium Arsenide (GaAs)) and a light detector device (phototransistor), both optically coupled and

Complete Guide to Optocoupler Datasheet 4-Pin

Complete Guide to Optocoupler Datasheet 4-Pin Configurations Extensive library of datasheets providing precise specifications, pinouts, and technical details to

How to Use Optacoupler: Examples, Pinouts, and Specs

An optocoupler, also known as an optoisolator, is an electronic component that transfers electrical signals between two isolated circuits by using light. The

PC817 Optocoupler: Pinout, Specifications, Circuits and

The PC817 optocoupler is a fundamental component in electronic circuits, seamlessly integrating an infrared emitting diode (IR LED) and a

Application Examples

Figure 1 shows the internal pin connection of a 4 pin AC-input SFH620A-x optocoupler TCET1600, K814P series; and figure 2, of a 4 pin DC-input optocoupler TCET1100, SFH61xA-x, and K817P series.

MOC3041 Optocoupler Pinout, Examples, Applications,

MOC3041 Zero Crossing Optocoupler Pinout and Examples MOC3041 is an optocoupler but unlike other optoisolators, it has a special

Optocoupler IC 4N35: Pinout, Datasheet, Features and

Introduction In electronics, where connectivity and isolation are paramount, the 4N35 optocoupler IC stands as a beacon of reliability and

4 channel optocoupler 3d models

Find 644272 4 channel optocoupler 3D models for 3D printing, CNC and design. Case for 4 insulated channels (5-24V to 5V) Chinese Board. ... Boitier pour la

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

4N25, 4N26, 4N27, 4N28

DESCRIPTION The 4N25 family is an industry standard single channel phototransistor coupler. This family includes the 4N25, 4N26, 4N27, 4N28. Each optocoupler consists of gallium arsenide infrared

What is 4N28 Optocoupler : Pin Configuration & Its

What is 4N28 Optocoupler? A 4N28 optocoupler device is an Industry type single channel-based Photo-transistor Coupler. There are different families of

4-Way Relay Board with Optocoupler (High Detailed)

TRU Components 4-channel relay module. High Detailed 3D model. Could be directly controlled by a microcontroller. Optocoupler-ingangen With...

AN3005 Modeling phototransistor optocouplers using PSPICE

This application note provides a guideline to model phototransistor optocouplers with first order approxi-mation using PSPICE models.
