48-core optical fiber distribution box OEM

Overview

48 Port Fiber Distribution Box provides 16, 24, 32 or 48 SC ports in a traditional two-layer design – a rear splice area for cable slack and splice protection, and a front interconnect area for SC ports. The FDB-48 is suitable for indoor or outdoor FTTX applications that support up to 48. Efficiently manage and distribute up to 48 fiber optic connections with the robust, weatherproof SJ ODB M12 fiber distribution box, ideal for telecommunications, data centers, and versatile network applications. The 48 core fiber distribution box is engineered to meet the demanding needs of modern. FDB-48 Series 48 ports Fiber Distribution Box, also called Splitter Distribution Box or Fiber Terminal Box, can be used in FTTH projects and is suitable for corridor, basement, room, and building's outer walls application. Modern telecommunications depend on 48 cores fiber optic distribution box as basic building blocks for fast data transfer over great distances. These devices and systems use light to transport data and provide better dependability and bandwidth than conventional copper connections. Built with an IP65-rated enclosure, this terminal box is designed to withstand harsh environments, making it suitable.
