American Composite Cable Tray Series

Overview

Ebo Systems Our GRP cable trays provide outstanding resistance to corrosive environments, extreme temperatures, and heavy loads, ensuring reliable and dura.

Key Takeaways

American composite cable trays, including fiberglass and FRP models, offer lightweight, corrosion-resistant, and durable solutions for industrial and commercial cable management. Leading Manufacturers and ModelsUS Tray (Atkore) produces a variety of made-to-order cable trays built to NEMA standards and UL certified, including I-Beam, C-Channel, and Trof (solid and vented bottom) designs. Their products emphasize airflow, dust protection, and easy installation with features like Quick Latch™ self-splicing bars, and they comply with Buy America requirements (Atkore).

Creative Composites Group specializes in fiberglass (FRP) ladder tray systems, designed for harsh environments such as chemical plants, offshore platforms, and water treatment facilities.

Their Enduro FR

P trays are lightweight, non-conductive, impact-resistant, and highly corrosion-resistant, outperforming steel in longevity and strength-to-weight ratio. Basor Electric offers a wide range of cable tray and ladder systems, including composite options, with extensive technical documentation, CAD/BIM files, and tools for project integration. Their systems are suitable for commercial and industrial applications requiring precise engineering and compliance with industry standards.

Key Features of Composite Cable Trays

Material: Fiberglass-reinforced plastic (FRP) or other composite materials for corrosion resistance and non-conductivity. Designs: Ladder, solid bottom, vented bottom, I-Beam, and C-Channel. Applications: Ideal for corrosive, wet, or high-temperature environments; suitable for chemical plants, refineries, offshore platforms, and water treatment facilities.

Compliance: Built to NEMA VE-1 standards, UL certified, and often meet Buy American requirements. Installation: Lightweight construction allows easier handling and faster installation; pre-punched holes and self-splicing features reduce labor time.

Additional Considerations

When selecting a composite cable tray, consider: Load capacity and span requirements. Environmental resistance, including chemical, UV, and moisture exposure. Integration with accessories such as covers, cleats, and strut systems.

Manufacturer support for custom designs, logistics, and technical documentation. For a comprehensive list of U. S. manufacturers, Creative Composites Group, Atkore (US Tray), Eaton, Legrand, and Basor Electric are among the top providers offering composite and fiberglass cable tray solutions that meet stringent safety and performance standards.
