Liechtenstein Active Optical Cable QSFP

Overview

The QAOC-10G4F1A is a 40Gb/s, hot pluggable active optical cable for Infiniband and Ethernet data transmission. It provides full duplex, parallel interconnects: 4 transmitting / 4 receiving data lanes and supports distance up to 100 meters. QSFP+ directly connected copper cables. The acronym QSFP stands for Quad Small Formfactor Pluggable, and QSFP is a family of connectors and cable assemblies that share a mating interface. Originally designed for 40G Ethernet (QSFP+), they have evolved to support 100G, 200G, and 400G speeds with new standards like QSFP28 and QSFP-DD. This AOC is compliant with the SFF-8436 QSFP+ MSA standards. Each lane can operate at 10 Gbps with lengths ranging from one. Our active optical cable assembly portfolio provides improved cable flexibility and longer reach as compared to both traditional passive copper and emerging active copper (ACC/AEC) solutions, supporting high performance computing, data center and networking interconnect applications.
