# AI graphics card 3090 server

## Overview

Yes, four RTX 3090 cards can run the same AI models as a single RTX A6000-class card, but you cannot use a regular consumer motherboard. You need server-grade platforms that expose enough PCIe lanes. Expect roughly 30% slower language-model throughput and much higher power use. RTX 3090: Two RTX 3090s with NVLink are a common choice for running large AI models. NVLink can provide improved communication between GPUs, though for many AI tasks, traditional. This report analyzes the market for NVIDIA RTX 3090 servers as of April 2026, focusing on their resurgence as high-value assets for Artificial Intelligence (AI) and Machine Learning (ML) workloads. Market Context: The analysis covers the global GPU server market, specifically focusing on the. View benchmark results comparing the RTX 3090 to other NVIDIA GPU types available for rent.
