Automatic Dehumidification Distribution Box

Overview

The unit features automatic/manual switching, real-time monitoring, and automatic dehumidification, as well as manual control options. It is suitable for rail or wall mounting and operates on an AC/DC 85-265V power supply. Distribution box be a kind of by switchgear, measure instrument, protection electrical equipment and auxiliary equipment be assembled in closing or semiclosed metal safe in power equipment. Multiple electrical equipments that box house comprises operationally all can generate heat, when box house. This is a distribution sub-panel specifically designed for power systems, serving as a dedicated device for line branching, power distribution, and circuit protection: The box body is made of weather-resistant and anti-corrosion materials (such as SMC composite materials), with a light-colored and. It the utility model is related to the dehydrating unit of distribution box, specially distribution box automatic dehumidification device. The moisture in the air condenses into water after passing through the semiconductor refrigeration unit, and is then discharged. This helps you quickly interpret patents by identifying the three key elements: Problems solved by technology Method used Benefits of technology The multiple electrical components contained in the box will generate heat during operation. When the air inside the box does not circulate and the heat.

Intelligent moisture removal device for switchgear cabinets

Smart dehumidification device, distribution cabinet semiconductor dehumidification, 30/45/65W aluminum alloy dehumidifier switchgear distribution box anti

Tongnai Anti-Dew Formation SMC Distribution Box Automatic ...

Weather-resistant and durable: The SMC material box body has anti-rust, UV resistance, and resistance to high and low temperatures, and can be used stably in outdoor complex environments for a long time.

Distribution box automatic dehumidification device

The utility model solves the electrical equipment in distribution box□Son□The problem of easily being broken down under element wet environment, there is provided one Kind distribution

Tongnai SMC Anti-Dew Point Branch Box with Automatic

Weather-resistant and durable: The SMC material box body has anti-rust, UV resistance, and resistance to high and low temperatures, and can be used stably in outdoor complex environments for a long time.

Smart dehumidification device, distribution cabinet semiconductor ...

The moisture in the air condenses into water after passing through the semiconductor refrigeration unit, and is then discharged out of the cabinet via a drainage pipe, achieving excellent dehumidification

Distribution box automatic dehumidification device

Distribution box automatic dehumidification device electrical structure described in the utility model is simple, easy to operate is cost-effective□This is matched somebody with somebody

Enclosures and Distribution boxes | Sonderhoff

The lifelines of highly automated industrial production for electrical distribution and for the control and safety technology of manufacturing plants come together in control cabinets and electrical distribution

Automatic dehumidification rainproof distribution box

Distribution box is, by electrical wiring requirement, switchgear, measuring instruments, protection electrical equipment and auxiliary equipment are assembled in envelope Close or in semiclosed
