Automatic pigtail trimming machine

Overview

Automatic trimming machine Find your automatic trimming machine easily amongst the 10 products from the leading brands (Busch Vacuum, BIO-UV, Casadei-Busel.

Key Takeaways

Automatic pigtail trimming machines streamline wire and cable processing by cutting, stripping, and trimming pigtail ends with high precision and minimal manual intervention.

Overview

Automatic pigtail trimming machines are specialized equipment used in cable and wire manufacturing to prepare pigtail ends for assembly, splicing, or termination. These machines combine multiple functions such as cutting to length, insulation stripping, trimming, and sometimes crimping, reducing human error and increasing production efficiency. They are widely used in industries like telecommunications, automotive wiring, and electronics assembly.

Key Functions

Cutting and Trimming: Machines precisely cut pigtail wires to the required length and trim excess insulation or conductor material. Stripping: Insulation is removed from wire ends without damaging the conductor, ensuring reliable electrical connections. Crimping (Optional): Some models integrate crimping for terminals or splices, automating the entire end-preparation process.

Automation Features: Modern machines include adjustable speed controls, tension management, temperature regulation, and digital interfaces for real-time monitoring and process optimization.

Types of Machines

Extrusion Machines: Apply insulation coatings to wires, protecting them from electrical discharge. Stranding Machines: Combine multiple wires into a single cable capable of handling mechanical stress. Coiling Machines: Wind cables into coils for easier storage and transport.

Integrated Trimming and Crimping Machines: Automate cutting, stripping, trimming, and crimping in a single workflow, such as the TE Connectivity APT-6, which handles multiple wires per splice and allows programmable sequences for continuous operation.

Technical Features

Material Construction: High-quality stainless steel and corrosion-resistant metals for durability. Precision Components: Premium motors, gears, and bearings ensure accurate cutting and trimming. Digital Monitoring: Real-time analytics and interfaces optimize production efficiency and reduce downtime.

Customizability: Machines can be configured for different wire gauges, insulation types, and production speeds.

Benefits

Increased Productivity: Automates repetitive tasks, reducing manual labor. Enhanced Accuracy: Consistent trimming and stripping improve product quality. Safety: Minimizes operator exposure to cutting tools and reduces handling errors.

Flexibility: Can handle multiple wire types and sizes without extensive retooling. Automatic pigtail trimming machines are essential for modern wire and cable production, offering high efficiency, precision, and reliability in preparing wires for downstream assembly or splicing operations.

Automatic trimming machine

Find your automatic trimming machine easily amongst the 10 products from the leading brands (Busch Vacuum, BIO-UV, Casadei-Busellato, ...) on

Cut / Strip machine for different wires and cables

WIRPEO Automation provides Semi-automatic and Full-automatic stripping machines for One core cable, Multi-cores cable, Coax cable, Flat cable and other cables. Semi-automatic wire strip

Automatic pigtail cable stripping cutting machine

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

The automatic pigtail cable stripping cutting machine operates with numerous functions and features that boost its performance during cable production. Modern machinery delivers automated systems that

Automatic machines – More efficiency through automation

The RailCutter draws the necessary data from eCAD or from the WMC; it does not need to be operated manually. The cut is fast and precise. The RailCutter is an extension of the Klippon® Automated

Wire Cut Strip and Terminate Equipment

Discover our versatile Automatic Terminal Crimping Machine designed for efficient processing of open barrel and closed barrel bulk terminals including pre

Rittal Automation Systems

The R8 E crimping machine is ideal for fast, meticulous processing of insulated wire end ferrules and standard PVC cables in cross

Cut & Strip Automatic Machines for Wire and Cable

WIRPEO Automation provides Semi-automatic and Full-automatic stripping machines for One core cable, Multi-cores cable, Coax cable, Flat cable and other

AMPLIVAR Product Terminator (APT)

Fast and Efficient AMPLIVAR Product Termination Our APT 6 terminators are engineered to crimp Magnet Wire, Pigtail AMPLIVAR Splices and Direct Connect

Your Guide to the Best Bud Trimmers in 2026 — Grow

1. Best Automatic Handheld Bud Trimmer Trim Daddy 3Plus The 3Plus is great for complete manual hand trimming. If you employ human trimmers, or you simply

Shop Bud Trimming Machines | Commercial & Home

Automate your cannabis harvest with top-rated bud trimming machines from CenturionPro, Twister, & GreenBroz. Shop wet & dry trimmers. Free shipping &

Solar Taping & Trimming Machines: A Guide for Manufacturers

Solar module manufacturing machinery transforms raw materials into finished solar panels. This complex process involves several steps and specialized equipment, including essential

Automated Trimming Machines | Hort Tech Systems

If you''re in need of automated trimming machines then Hort Tech Systems has the solution for you! Browse our inventory using the link above.

High Speed Automatic Head to Tail Double Trimming ...

3. High-Speed Processing with Double Trimming Precision Achieve rapid material processing at speeds 40% faster* than manual edge banding systems, thanks to its automatic working method and

Efficient Industrial Solutions with Advanced pigtail welding machine ...

About pigtail welding machine Pigtail welding machine are specialized tools used in the welding industry to join plastic materials efficiently. These devices employ heat and pressure to fuse plastic

Pigtail Machine | Morita & Company

STEP 3 PIG TAIL Pigtail Machine End of coil spring is formed as pigtail shape. Our machine performs to forming pigtail shape automatically with forming jig that

Trimpro Automatik Variable-Speed Wet Bud Trimming

The Trimpro Automatik Variable-Speed Wet Bud Trimming Machine streamlines the trimming process with its adjustable four-blade assembly and variable-speed

Neyseki Optical Fiber Cleaver High Precise Fiber Cutting Machine ...

Buy Neyseki Optical Fiber Cleaver High Precise Fiber Cutting Machine Automatic Blade Return Pigtail Jumper Leather Cable Cutter at Walmart

Alibaba

High efficiency NEOPL-2000A fiber optic pigtail polishing machine for patchcord $13.00 / piece 1 piece(Min Order) CN Hefei Xingcheng Communications Co., Ltd. 7YRS 3.0 (2) | "good Service"
