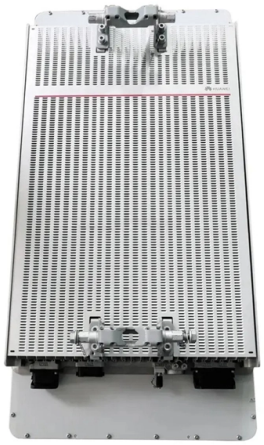
Color Distance of Optical Module Pull Ring



Overview

This article provides a professional guide on transceiver pull tab color codes by wavelength—spanning SFP, SFP+, CWDM, and BiDi modules—and introduces how LINK-PP standardizes color matching across its optical product lines. The pull ring of the optical module adopts the function of using different colors Their main function is to identify the type, wavelength, and function, allowing technicians to quickly determine its type and use case without removing the optical module. Every optical transceiver operates at a specific wavelength, typically. Distinguish the wavelength by the color of the pull ring of the optical module In order to distinguish their own optical modules, different manufacturers can distinguish them by their wavelength, transmission distance, packaging, etc. Commonly used optical modules have four wavelengths, 850nm, 1310nm, 1490nm, and 1550nm. The industry divides the entire band into.

Article Content

The meaning of the optical module with different color pull ring

Their main function is to identify the type, wavelength, and function, allowing technicians to quickly determine its type and use case without removing the optical module.

How to Identify Optical Transceiver Wavelengths by Pull

This article provides a professional guide on transceiver pull tab color codes by wavelength—spanning SFP, SFP+, CWDM, and BiDi modules—and

Distinguish the wavelength by the color of the pull ring

The color of the pull ring corresponding to the wavelength of 850nm is black, the color of the pull ring of 1310nm is blue, the color of the pull ring of

Meaning of Optical Module Pull Tap Colors

The color of the optical module pull tap is not just for aesthetics. Its core function is to quickly identify the module''s applicable fiber type, wavelength, and function.

How to Distinguish the Wavelength by the Color of the Pull Ring of the ...

Among them, the color of the pull ring corresponding to 850nm of the Gigabit SFP module is black, the color of the pull ring corresponding to 1310nm is blue, and the color of the pull ring of 1490nm is

How To Identify The Wavelength Of SFP CWDM

For a conventional optical module, we can easily judge the wavelength of the optical module from the color of the latch ring. For example,

Quick Guide: Identifying CWDM SFP Wavelength Using Latch Ring

With this CWDM SFP color coding guide, you can easily identify the wavelength of any SFP CWDM optical module by its pull ring color. Whether you''re working with front wave or back

Understanding Transceiver Pull Tab Colors:

Learn how to identify optical transceivers by pull tab color. This guide explains wavelength, distance, and fiber compatibility for SFP, QSFP, BIDI &

Distinguish the wavelength by the color of the pull ring of the optical ...

Distinguish the wavelength by the color of the pull ring of theoptical module In order to distinguish their own optical modules, different manufacturers can distinguish them by their wavelength, transmission

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

How to Identify Optical Transceiver Wavelengths by Pull-Tab Color:

In fiber optic networks, accurately identifying the wavelength of an optical transceiver module is essential for ensuring optimal network performance and reliability. One of the most

Meaning of Optical Module Pull Tap Colors

Optical module pull tab colors serve as a visual language in network operations and maintenance. Their core value lies in simplifying module selection and troubleshooting.

Meaning of Optical Module Pull Tap Colors

QSFP+ Optical Module Pull Ring Colors 40G QSFP+ 850nm SR4 150m optical module with a beige pull-tab design, designed for short-distance, high-speed data transmission.

How to Distinguish the Wavelength by the Color of the Pull Ring of the ...

In order to distinguish optical modules, different manufacturers can distinguish them by their wavelength, transmission distance, packaging, etc. Do you know what other methods to distinguish them? This

How to Identify Optical Transceiver Wavelengths by Pull-Tab Color:

Why Pull-Tab Colors Matter for Optical Modules Optical transceivers operate at various wavelengths—such as 850nm, 1310nm, and 1550nm—that correspond to different transmission

SFP optical module configuration

SFP transceiver module configuration are: lasers (including transmitter TOSA with the receiver ROSA) and board composition IC and external accessories and external accessories, there are housing,

Introduction of SFP Optical Module| Four-Faith

If the bare module is not marked, it is easy to be confused. Generally, manufacturers will distinguish the color of the pull ring. For example, the black pull ring is multi-mode and the

The meaning of the optical module with different color

The pull ring of the optical module adopts the function of using different colors Their main function is to identify the type, wavelength, and function, allowing

Meaning of Optical Module Pull Tap Colors

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

In the complex network world of data centers, optical modules play a crucial role, efficiently converting electrical and optical signals to ensure stable, high-speed data transmission across fiber optic
