British Explosion-Proof Industrial Switches

Overview

They have been developed to satisfy the latest IECEx and ATEX Standards and provide Explosion Proof switching to satisfy the hazardous conditions created within the oil, chemical, pharmaceutical and food processing and packaging industries. They combine Explosion Proof protection. R. Our products are certified in accordance to ATEX and IECEx approvals as well as NEC. The safety switches which are a part of the installation and control product portfolio are specially designed for. Killark's explosion proof, dust-ignition proof fused and non-fused disconnect switches are suitable for use in the most harsh and hazardous areas. The specification of zone 22 is that an explosive atmosphere is not likely to occur, and if it does, it is only for a short time. Critical operations depend on our weatherproof, flameproof (Ex db) or intrinsically safe (Ex i) products for monitoring pressure, temperature, level and more. ATEX Zones 21 & 22 are specific to areas at risk from hazardous dust, such as flour, starch, metal dusts, pesticides, and chemical dusts.

Article Content

R. STAHL | Safety Switches | Explosion Protection

R. STAHL is a competent and reliable supplier of explosion-protection products and systems. Our products are certified in accordance to ATEX and IECEx approvals

Hazardous Location | Killark

These switches provide protection in areas where hazardous materials are developed, handled, and stored. Our disconnect switches are used as motor disconnects, industrial control, or service

ATEX enclosed safety switches

The ATEX enclosed safety switches are built to last and resist the wear of harsh operating conditions. They are made of high-quality, UV-resistant materials and the degree of protection is IP65, making

Pyropress ATEX, IECEx switches, transmitters & valves

We design and build some of the toughest and most reliable switches and transmitters in the world. Critical operations depend on our weatherproof,

ATEX Switches, Pushbuttons & Control Stations

Kempston Controls stocks an impressive range of ATEX rated switches, pushbuttons and control stations from many leading brands including Pepperl +

CEAG GHG25 Explosion Protected Advanced Switches

Certified for use in Zones 1 and 21, the new series of GHG25 safety switches and switch disconnectors brings higher switching and isolation capacities, improved

Explosion Proof Switches, Sensors, Valve Indication

Specialists in the design and manufacture of Instrumentation for Hazardous Locations and Explosion Proof applications.

EX Zone 1 & 2 Enclosed Switchgear

A range of Switch-Disconnectors housed in IP65 heavy-duty cast enclosures – ATEX certified for use in Cat II, Zones 1, 2, 21 & 22 environments are available

Atex Zone 1,2,21 & 22

Built to meet rigorous safety standards, this switch is suitable for use in zones 1,2,21,22 making it ideal for industrial applications such as oil and gas facilities,

Explosion Proof Selector Switches | ATEX & IECEx

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

Explore how explosion- proof selector switches ensure safety and compliance in hazardous areas. Built to ATEX and IECEx standards for industrial

Explosion-Proof Non-Contact Safety Interlock Switches

Discover explosion-proof non-contact safety interlock switches at Kimo Instruments. Ensure high-security, tamper-proof safety in hazardous industrial environments.

Explosion Proof Light Switches Supplier | Top-quality Explosion Proof ...

Lampsuite specializes in manufacturing explosion-proof switches and provides industrial-grade solutions for explosion-proof light switches. As a professional explosion-proof light switch supplier, our

Explosion-proof disconnect switch, Explosion-proof

Find your explosion-proof disconnect switch easily amongst the 10 products from the leading brands (STAHL, SCAME, Craig & Derricott, ...) on DirectIndustry, the

Technical standards

The following standards have been published to date or, where indicated, are due for publication shortly: BS EN 13463 Non-electrical equipment for use in potentially explosive atmospheres. Basic method

Atex Zone 1,2,21 & 22

The Explosion-Proof Light Switch is engineered for maximum safety in hazardous environments where explosive gases, vapors, or dust are present. Built to meet

Best Explosion Proof Switches for Hazardous

Explore top-rated explosion-proof level switches, float switches, limit switches, and pressure switches tailored for hazardous environments like oil &

Explosion Proof Plug and Sockets | ATEX Zone 1 & Zone 2

Hexlon Explosion Proof Plugs and Sockets, ATEX and IEC Ex compliant, ensuring secure connections in Zone 1 and Zone 2 hazardous areas.

Explosion Proof Non Contact Safety Interlock Switches

Electrical switching elements are FULLY encapsulated. IDEM''s range of Explosion Proof Non Contact Switches have been developed to satisfy the latest IECEx
