Busline Feeder High Voltage Switchgear

Overview

Discover durable 12KV incoming and outgoing feeder switchgear for industrial power distribution. Shop stainless steel, high-voltage solutions with 50/60Hz frequency support. This indicates the extent of the installation, such as the number of busbars and branches, and also their associated apparatus. Service Entrance Run, Plug-In Type Vertical Riser, Plug-In Type Horizontal Run and Feeder Type Tie Run illustrate the basic systems. Their importance. Engineers use them to decide how feeders, transformers, and circuit breakers (CBs) connect to the main current-carrying node in medium-voltage (MV) and high-voltage (HV) installations. In high-voltage switch stations, each feeder is also fitted with current transformers (CTs) and. Maximum ratings are 5000 A Copper and 4000 A Aluminum (600V).
