Australian backbone optical cable

Overview

HyperOne will be the first true private and national, backbone fiber optic transmission network across Australia. When I set foot in Kalgoorlie in my first few weeks as InfraCo's new CEO, I was struck by the sheer scale of our country and the ambition of what we're building. Watching. Kathryn Jones can't put a number on how many thousands of kilometres of fibre optic cable will be needed to run through tunnels under the Australian continent. When the Telstra executive, who delivers big projects for the company's InfraCo business, went to a conference run by the Pacific. SMAP subsea cable project hits major milestones, set to deliver Australia's first hyperscale national fibre backbone The SMAP subsea cable project—part of HyperOne's push to build Australia's first hyperscale national fibre backbone—is advancing rapidly, with multiple engineering and construction. The AARNet network consists of thousands of kilometres of fibre optic cable, connecting major cities and regions around Australia. We also own and operate spectrum on the Indigo submarine cable system connecting Sydney to Perth (Indigo Central), which provides an additional link between the east. Our successful high fibre density cable, FlexTube®, has been tailored to Telstra's fibre counts and custom engineering requirements. More recently, Prysmian and Telstra have significantly enhanced of power and telecommunication cables of with 112 the manufacturing plants, 25 research Technical and. HyperOne is committed to building Australia's first national fibre backhaul network. For the first time, we are making.

Telstra Intercity Fibre Network (Aura Network): Sydney to Melbourne ...

Today, we''re excited to officially launch the Sydney to Melbourne coastal route of our new fibre backbone – the Aura Network. Global network traffic is predicted to grow by five to nine times by

Australia''s fibre backbone race picks up speed

And it''s laying down another 14,000 kilometres, putting pink and blue cables into the ground to better connect Australian cities. With 2200 kilometres completed to date, the full cost of a new intercity fibre

Sydney-Melbourne-Adelaide-Perth Cable to Deliver 400

The SMAP subsea cable project—part of HyperOne''s push to build Australia''s first hyperscale national fibre backbone—is advancing rapidly, with

National Network

The AARNet national network consists of thousands of kilometres of fibre optic cable, connecting major cities and regions around Australia.

TELSTRA CABLE GUIDE

2000''s, direct buried cable specifically for Australia''s expansive soils. Our successful high fibre density cable, FlexTube®, has been tailored to Telstra''s fibre counts and custom engineering requirements.

HyperOne

HyperOne is committed to building Australia''s first national fibre backhaul network. This will enable fast, reliable and accessible connectivity across all states and

Australia''s Fiber Backbone Map

Is there a map outside of the telcos or government reports that includes a detailed map of Australia''s fiber backbone from carriers like Telstra, Optus, AAPT (TPG) and nextgen (Vocus) rather

HyperOne: Australia''s Massive Fiber Network

HyperOne will be the first true private and national, backbone fiber optic transmission network across Australia. Specifically, the project will connect

Telstra Wamarra Project Map & Fibre Backbone

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

At the heart of this rollout is the Telstra Wamarra Project Map, a comprehensive visual representation of new fibre optic cable routes planned and under construction across the country —

Australia''s fibre backbone race picks up speed

Kathryn Jones can''t put a number on how many thousands of kilometres of fibre optic cable will be needed to run through tunnels under the

Why Loose-Tube Optical Cables Dominate Outdoor Backbone

We provide mature loose-tube optical cable products and tailored solutions, delivering solid, stable and high-performance connectivity for all outdoor backbone transmission applications. What Is Loose

Telecommunication | Global Pacific | Project Management

Browse telecommunication projects worked on by Global Pacific including broadband networks, fibre optic cable projects and emergency networks.

What Is a Fiber Optic Backbone Network and Why for

Do you know what a fiber optic backbone network is? It may sound like a hard term, but, it is actually quite impressive. Read our blog to find out why.

Fibre Optic Cable Loose Tube, Indoor/Outdoor Riser

High-quality fibre optic cable for Australian networks, including loose tube, indoor/outdoor riser options. Reliable solutions from Apollo Technology.

Update: Rolling out fibre in Australia''s backbone

Workers at Leighton Contractors, Nextgen Networks and partner VisionStream have begun turning the sods in Mt Isa, Queensland, to lay fibre

Australia s digital backbone

Australia''s digital backbone Access to fast and reliable broadband plays a vital role in the daily lives of people across Australia and is critical to our national economy.

HyperOne Australian fiber backbone network planned

Bevan Slattery, an Australian entrepreneur perhaps best known for bankrolling submarine cable systems, has announced a new terrestrial initiative, HyperOne.

SMAP Australia''s Newest Undersea Cable

Overview Sydney Perth A new transcontinental submarine cable system connecting Sydney, Melbourne (Torquay), Adelaide and Perth (S-M-A-P), SMAP
