Australian Stock Cable Tray Standards

Overview

Several Australian Standards regulate cable tray systems to ensure safety and reliability. It replaces traditional methods such as conduit piping or manual. EzyStrut offers some of the strongest cable trays in their classes, and produces them to a very high structural and visual standard. Cable trays offer continuous support of cables, are lightweight, quick and straight forward to install just about anywhere, and generally mean that changing cabling. As a cabler, you need to be familiar with all the cabling rules and standards that apply to your work. In addition to the Telecommunications (Cabling Provider) Rules 2025, you also need to understand and follow: Telecommunications (Types of Cabling Work) Declaration 2024. To view all industry. This Standard applies to the installation and maintenance of fixed or concealed cabling or equipment that is connected, or is intended to be connected, to a telecommunications network, including any cord or cordage, or that part of any cord or cordage, that is connected as fixed or concealed. Cable tray provides strong and reliable support for electrical wiring in commercial and industrial projects.
