Binding process for cabinets at the front

Overview

Traditional American method featuring a solid wood frame attached to the front of the cabinet box. Pro Tip: Face frame construction typically uses 1. Understanding cabinet construction fundamentals is essential for making informed decisions about your project. As we have seen in the, earlier Unit, the reasons. Take the doors and drawer fronts off the cabinet and toss them in the garbage can! They are gone for good and will not be needed, as they will only be a reminder of the 1980's. Next, you will measure the openings (hole in the face of the cabinet, measure from the inside edges of the face frames). Edge banding is a critical process in woodworking, ensuring that raw panel edges achieve a polished, durable finish.
