Cable tray moved to the left

Overview

Solved: HELP METo have aligned connection based on your screenshot and assume you draw from left to right (Direction is important!!!), you have to set both.

Key Takeaways

To move a cable tray to the left, you can use the Modify tools in Revit to adjust its position, ensuring proper alignment and avoiding conflicts with other elements. Steps to Move a Cable TraySelect the Cable Tray Click on the cable tray run you want to move. Ensure the entire run or the specific segment is selected.

Use the Move Tool In the Modify tab, select the Move tool. Click a base point on the tray, then drag or enter a precise distance to shift it to the left. This allows accurate repositioning without altering the tray's elevation or orientation.

Check for Conflicts After moving, verify that the tray does not interfere with other elements like conduits, lights, or distribution boards. Revit's clash detection or visual inspection can help ensure proper clearance. Adjust Elevation if Needed If the tray needs to maintain a specific height, adjust the middle elevation in the properties panel to match the design requirements.

Use Mirror or Rotate for Complex Adjustments If the tray needs to be inverted or rotated, you can use the Mirror tool in a section view or the Rotate tool to achieve the desired orientation. Note that mirrored trays may revert to default orientation after trimming, so a model-in-place approach may be necessary for permanent adjustments.

Tips for Smooth Cable Tray Management

Plan the Path: Draw the tray where coordination is critical, avoiding obstacles like transformers or ceiling fixtures. Use Cable Tray Accessories: Organizers, dividers, and supports can help maintain proper spacing and prevent sagging when repositioning trays. Check for Maintenance Access: Ensure the new position allows easy access for future maintenance.

By following these steps, you can effectively move a cable tray to the left while maintaining proper alignment, clearance, and compliance with design standards.
