Cable trays for substations in Vietnam

Overview

Access 34 verified Cable Trays Suppliers in Vietnam with shipment-level prices, volumes, routes, buyer networks, and verified decision-maker contacts — all backed by bills-of-lading.

Key Takeaways

Vietnam offers a range of high-quality cable trays for substations, with manufacturers providing products compliant with international standards and suitable for industrial and power infrastructure projects.

Key Manufacturers and Suppliers

Several reputable companies in Vietnam specialize in cable trays suitable for substations and other industrial applications: Dongkwang Vina: Offers durable cable trays, ladder trays, and accessories, with customization options for electrical, power generation, oil & gas, and telecommunications projects. Butraco: Provides cost-effective, high-quality cable trays and accessories for various industries, ensuring reliability and compliance. Sang Tao: Designs, supplies, and installs cable ladders, trays, and trunking systems compliant with NEMA VE1, IEC, and JIS standards, suitable for substation environments.

HAB

T: Supplies cable trays, ladders, and trunkings with certifications including ISO 9001: 2015, ISO 14001: 2015, and IEC 60076 series, and is a trusted partner of EVN and industrial clients.

Invico Industrial JS

C: Specializes in electrical systems for substations, including cable tray ladders, transformer stations, and medium/low voltage cabinets, using advanced CNC technology. Phuc Long Intech and Viet A: Both companies manufacture cable trays for large-scale projects, including industrial and commercial installations, with modern machinery and technology from Japan and South Korea.

Product Standards and Materials

Cable trays for substations in Vietnam are typically made from steel or stainless steel, with powder coating or hot-dip galvanization to ensure durability and corrosion resistance. They are designed to meet ISO, IEC, and NEMA standards, ensuring safety, electrical performance, and compliance with both local and international regulations. Substation-specific trays often support heavy-duty cables, high current loads, and complex routing requirements.

Considerations for Substation Projects

When selecting cable trays for substations in Vietnam: Compliance: Ensure the trays meet IEC 60529, IEC 60076, and local EVN requirements for electrical safety and environmental conditions. Customization: Many manufacturers offer custom sizes, load capacities, and accessories to fit specific substation layouts. Installation Support: Choose suppliers that provide design, supply, and installation services, especially for large or high-voltage substations.

Durability: Consider coating, material thickness, and corrosion resistance, particularly in humid or coastal regions.

Conclusion

Vietnam has a robust market for cable trays suitable for substations, with multiple manufacturers offering high-quality, certified, and customizable solutions. Companies like Dongkwang Vina, Butraco, Sang Tao, HABT, Invico, Phuc Long Intech, and Viet A provide reliable options for industrial and power infrastructure projects, ensuring compliance with international standards and local requirements.
