A distribution box is a low-voltage electrical enclosure that receives incoming power and distributes it safely to multiple outgoing circuits through protective and switching devices such as MCBs, RCDs, RCBOs, fuses, isolators, busbars, neutral bars, earth bars, and surge protective devices. Today, electrical systems are essential for homes and industries. Whether in your own home, in a rented apartment or in a business, the distribution box is a central element of every electrical system. Despite this, it often ekes out an inconspicuous existence in the basement or utility room until something stops working properly or an extension becomes.
