Daring! Do It!TIME VISIBLE! Frequency Distribution AmplifierPulse Box™ is built to strengthen that missing visibility layer with smarter LT distribution monitoring, field-level protection, and operational control. Because the next phase of grid modernization is not just about knowing the loss. #PulseBox. The PDC3301e is a 19” rack-mounted, dual-input, ten-output device for high-performance pulse distribution with state-of-the-art intelligent failover switching and monitoring capabilities. Status is locally observable on a cleanly designed front panel with LED indicators, and it is fully manageable. Indication Lights: These provide visual availability and status of mains power supply. Each component plays a specific role.
