Cable tray and support frame price

Overview

Cable trays are a type of cable management system used to support and organize electrical cables and wires in commercial, industrial, and residential settings.

Key Takeaways

Cable tray support frames typically range from $10 to $150 per unit, depending on type, material, and load capacity.

Overview of Cable Tray Supports

Cable tray support frames are essential for safely mounting and organizing cable trays in commercial, industrial, and data center environments. They include wall brackets, floor supports, ceiling hangers, and specialized clamps designed to hold wire mesh, ladder, or solid-bottom trays. Supports are usually made from zinc-plated steel, stainless steel, or electro-galvanized steel, offering corrosion resistance and durability.

Price Ranges

Basic wall or floor brackets: $10–$30 per piece for standard zinc-plated steel supports suitable for light to medium loads. Heavy-duty or reinforced supports: $50–$150 per unit, designed to hold larger trays or heavier cable bundles, often used in industrial or data center installations. Ceiling hangers and specialized clamps: $20–$80 per piece, depending on size and material, including slotted strut channels for adjustable suspension.

Accessories such as splice couplers, tees, and cross fittings may add $5–$25 per component, depending on complexity and material.

Factors Affecting Cost

Material: Stainless steel and hot-dip galvanized supports are more expensive than standard zinc-plated steel. Load capacity: Supports rated for higher weight per foot (up to 280 lbs/ft) cost more. Tray type compatibility: Wire mesh, ladder, or solid-bottom trays may require different support designs, influencing price.

Brand and certification: Products from recognized brands or UL-listed supports may carry a premium.

Purchasing Tips

For residential or light commercial use, standard zinc-plated wall or floor brackets are cost-effective. For industrial or high-load applications, invest in reinforced or stainless steel supports to ensure safety and longevity. Consider bulk purchases from suppliers like McMaster-Carr or Amazon for discounts on multiple units.

By evaluating the type of cable tray, load requirements, and installation environment, you can select the appropriate support frame within the $10–$150 range per unit.
