China-Europe Optical Cable Full Coverage

Overview

China Telecom and TransTeleCom (TTK) have completed one of the world's first terrestrial high-bit-rate fiber routes connecting China and Europe. The 100G cable connects data points across Asia to Frankfurt, Germany, with interconnected communications lines at Russian Zabaikalsk and. The Submarine Cable Map is a free and regularly updated resource from TeleGeography. This visualization shows the growth of the undersea cable network, global internet peering capacity, and the distribution of IP addresses via BGP announcements over time. Use the controls at the top to play the animation or step through year by year. For more details and insights, please read this. Through our Optical Transmission Network (OTN), China Telecom (Europe) offers Global Wavelength Services to our worldwide customers with fully transparent circuit transmission. Our Global Wavelength Services provide top quality large bandwidth data transmission products up to 100Gbps through OTN. The European Commission has doubled its anti-dumping duties on optical fibre cables from China, following an investigation which found that Chinese exporters of optical fibre cables were attempting to impede the effects of the original measures. The proposed EMA (Europe-Middle East-Asia) cable would connect Hong Kong to China's island. The Infrastructure Connectivity Map (Broadband maps - BBmaps) webapp provides infrastructure visualization of ICT networks.
