E-type cable trays

Overview

CT-E-type cable trays have integrated extension part and for jointing bolt sets RS 5 (bolt M6x12 and nut M6) or quick locks CT-QL (for trays H=60mm) can be used. Both create a sufficient electrical conductivity, which eliminates the need to install a separate grounding wire between. EAE cable trays and ladders provide high-strength cable protection that protects the cables from external factors. EAE cable trays are mass produced with the 'Roll Forming' method on automatic production lines. The standard tray length is 3m. Cable tray supports and. Not all cable trays are equivalent. CT-E-type trays are typically used in office- and commercial buildings, schools, hospitals and shopping centres, but also in warehouses, parking halls and industrial buildings.
