EPS distribution box specifications

Overview

EPS Box-TP is designed for three-phase grid. Per voltage range is 220/230/240V; frequency is 50/60Hz. Other technical requests should comply with the requirement of the local public grid. Check the grid voltage and compare with the permitted voltage range (refer to technical data). For more information about the Fox ESS range, visit: • PC, Robust metal enclosure IP65 • Applied to residential, commercial solar installations • Compatible with H1-G2/KH/EVO inverter • Automatically switch to On-Grid/ Off-Grid state Max. input current 100A Safety Rated Voltage Rated. Connects to on-grid inverters (24A), off-grid inverters (24A), utility grid (63A input/25A output), and loads (63A). Suitable for environments with 4-100% humidity, it meets diverse power distribution needs. EPS BOX PRO is suitable for the residential power system and integrates Smart Meter, Breaker, ATS and other devices internally; It features convenient installation, and the power supply status of the load can be switched aut matically or manually. 3), allows you to use the inverter for emergency services in the absence of the grid, allowing the loads to be powered both from the public network and the power production installation, avoiding parallel.
