Construction power distribution box ACS

Overview

The SD-ACS construction site distribution box is suitable for temporary electricity consumption on the construction site and outdoors, and meets the requirements of "three-level power distribution, two-level leakage protection, one machine, one brake, one leakage and one box". The SD-ACS construction site distribution box is suitable for temporary electricity consumption on the construction site and outdoors, and meets the requirements of "three-level power distribution, two-level leakage protection, one machine, one brake, one leakage and one box". ENERGYBOX is a complete range of Assemblies for Construction Sites (ACS) pre-wired boards that can be wall-mounted or installed on a support. The panels are made in a sturdy and handy two-component technopolymer cabinet with a fire-resistant backrest, which allows them to be stored and reused in. The 68 ACS range is composed of an extensive selection of wired boards which are certified in accordance with the Standard EN 61439-4, and are capable of meeting all electrification requirements, from the smallest to the biggest construction sites. The boards are available in numerous. SD-ACS construction site distribution box-SENDALL (CHINA)ELECTRIC CO. Prefabricated customized boxes are used, which are divided into low-voltage warehouse, medium-voltage warehouse, machine warehouse and spare parts warehouse according to different functions, including all power distribution. The ACS Intelligent floor system for raised floor applications is a proven labor savings solution that allows for easy adds, moves and changes. We custom design each system based off of your project needs. High impact and UV rays resistance. The built-in circuit breaker group ensures working performance and reliability, and is easy to use and safe.
