Cuvette Spectrometer

Overview

UV/Vis Cuvettes | Glass and Quartz Cuvettes | METTLER TOLEDOThe cuvette used to measure a sample is a part of the spectrophotometer's optical system. There.

Frequently Asked Questions

What is the path length of the cuvette?

The optical path length of a cuvette is the distance of light that goes through the interior walls of a cuvette. On a standard spectrometer cuvette...

Why is the right material of the cuvette important?

The material of the cuvette can cause its own absorbance depending on the wavelength. Quartz cuvettes are completely translucent over the whole mea...

What is the transmittance range?

According to the Beer-Lambert law, absorbance is directly proportional to the cuvettes' path length and sample concentration. Selecting an ideal pa...

Should I remove the cuvette after each measurement?

For best measurement practice, the cuvette should remain in the cuvette holder between the measurements. If removed, care should be taken to always...

Can I change the cuvette type during measurement cycles?

For best results, the reference and sample measurements must be done using the same type of cuvette.

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

Why are there different types of cuvette material?

Cuvettes must have windows fabricated from a material that is transparent in the spectral region of interest.

Which cuvette material is best for UV measurements?

For best results of measurements in the UV range, UV-transparent glass needs to be used, such as quartz glass or SUPRASIL® glass. SUPRASIL® is a tr...

Article Content

UV/Vis Cuvettes | Glass and Quartz Cuvettes | METTLER TOLEDO

The cuvette used to measure a sample is a part of the spectrophotometer''s optical system. Therefore, the position, geometry and condition of the cuvette can have an influence on the accuracy and

UV-Vis & UV-Vis-NIR Cuvettes & Flow Cells

Agilent offers a wide range of cuvettes with a choice of path lengths for use with UV-Vis and UV-Vis-NIR systems, including rectangular cells, micro cells, cylindrical cells and flow cells with various aperture

Selecting the Right Cuvette: A Comprehensive Guide to

These instruments are critical in a range of analytical techniques, such as UV-Vis spectrophotometry, fluorescence spectroscopy, and others that require accurate

Spectrophotometers UV/Vis | Micro-Volume & Cuvette-Based

UV/Vis spectrophotometers offer superior optical design and unparalleled performance across a wide range of applications including micro-volume measurements.

Guide to Cuvettes

As used for spectroscopy, cuvettes are essential for holding liquid samples. Select the right cuvette for your application to yield accurate

Cuvettes for Spectrophotometer: a Comprehensive Guide

Sample Holder: The primary role of a cuvette in spectroscopy is to hold the sample. Whether the sample is gas, liquid, or solid, it is placed inside the cuvette for analysis. The cuvette allows the sample to be

UV-Vis Quartz Cuvette 50mm Path Length for 751 722 Spectrometer,

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

UV-Vis Quartz Cuvette 50mm Path Length for 751 722 Spectrometer, Heat Resistant up to 600C with Sealed Cover, Lab Glassware 2 Pack

What Is a Cuvette and How Is It Used in Spectrophotometry?

A cuvette is a small, transparent container used in scientific laboratories to hold liquid samples for analysis. It is specifically designed for use in a spectrophotometer, an instrument that

What Is A Cuvette?

How To Use a Cuvette? This is a brief description on how to use a cuvette and will also help answer the question: What is a cuvette? Also if you would like more information about how to use a cuvette in

Spectrophotometer Cuvettes

Each product, from micro quartz cuvettes to macro cells, is crafted to assist with the precise and efficient analysis of samples. Plastic cuvettes for spectrophotometers have varied designs and functions and

Types of Cuvettes and Cells

Screw Cap Spectrometer Cuvettes Screw Cap Standard Spectrophotometer Cuvettes, Rectangular Spectrophotometer cuvette cells with PTFE screw caps

Spectroscopy Cuvettes and Cells | Fisher Scientific

Browse a full range of Spectroscopy Cuvettes and Cells products from leading suppliers. Shop now at Fisher Scientific for all of your scientific needs.

Cuvettes and uv-cuvettes for spectroscopy

Cuvettes and UV-cuvettes enable precise results in spectroscopy due to an optically perfect transmission range. Disposable plastic cuvettes for the UV/VIS range are

What is a Cuvette? A Guide to Spectrophotometer

The ultimate guide to laboratory cuvettes. Learn what a cuvette is, how to choose the right material (quartz, glass, or plastic), understand path length, and its use in

Cuvettes for Spectrophotometer: a Comprehensive Guide

Complete guide understanding cuvettes for spectrophotometer made of UV quartz, optical glass, and plastics for disposable use.

Spectrophotometer Cuvettes | VWR, part of Avantor

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

The small cuvettes securely hold substances to study the ability for electromagnetic radiation absorbed or emitted. Spectrophotometer cuvettes are manufactured in a variety of clear materials to support

Explained: UV vis Spectrophotometer and Fluorescence

Any material that is transparent to the required wavelengths can be used to make a cuvette. And a wide selection of cuvette volume is available. The sub-micro

FireflySci Cuvette Shop

In our product line you will find a wide range of accessories including UV/VIS calibration standards, a fully complete UV cuvette line for spectrophotometers
