Distribution boxes are numbered sequentially

Overview

The simplest system is straight sequential numbers: BOX-001, BOX-002, BOX-003. This works well for small moves where you just need to track total box count against an inventory sheet. Room prefixes. A box without a number is a box you can't verify, can't search, and can't prove arrived. The "best" system often depends on the specific context and scale of operations. For example, Box 1, Box.
