# Does Huawei have 10G 120km optical modules

## Overview

Huawei SFP-10G-USR is a 10Gbps SFP+ optical transceiver module designed for ultra-short reach data transmission over multimode fiber. Single-fiber bidirectional (BIDI) optical modules must be used in pairs. It is commonly deployed in high-density switching environments where devices are located within the same rack or adjacent racks. Optical Interoperability with 10GBASE XENPAK, X2, and XFP Interfaces On the Same Link Use the Compatibility Tool to verify FS transceiver compatibility with your device and access test reports. This. 155M and 1G SFP modules for Huawei switches and routers. FX (2km), SX (550m), LX (10-80km), ZX (120km), and copper options with industrial variants. 40km and 80km wavelengths (1271-1611nm) for fiber capacity expansion. It provides a wide range of Interface Type, including LC, SC and FC, suitable for both Data Center and Telecom applications.
