Construction site electrical distribution box board

Overview

A construction site distribution board is a specialized type of panel used to manage and distribute electrical power on temporary job sites. Unlike residential or industrial panels designed for long-term installations, these boards are built for mobility, durability, and flexibility. The panels are made in a sturdy and handy two-component technopolymer cabinet with a fire-resistant backrest, which allows them to be stored and reused in. BOSECKER construction site power distributors are designed and manufactured in accordance with the manufacturer standard IEC 61439 and user standard IEC 60364. The robust sheet steel housing has been. For high risk and arduous environments, temporary mains distribution equipment can be supplied within robust crash frames.
