Function of SC-SC fiber optic patch cord

Overview

SC-SC Fiber Optic Patch Cords are used to connect networking devices for signal routing. Among the most widely used connectors are SC (Subscriber Connector) and LC (Lucent Connector) patch cords—two designs that, while serving the same core purpose, differ significantly in size, performance, and application. It is mainly used in applications such as optical fiber communication systems, optical fiber access networks, optical fiber data transmission networks, and local area networks. It can be. As networks move to higher speeds and higher density, choosing the right fiber optic patch cords becomes critical to the reliability of your system. Multimode SC-SC Duplex Patch Cab. It is dismountable, flexible and featured wit small size, low insertion loss and lower price.
