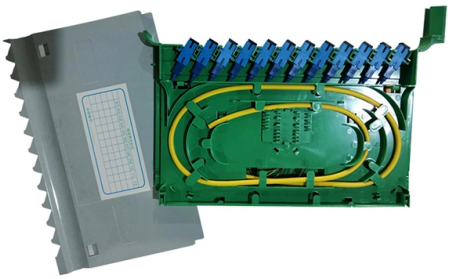
GPON device normal indicator light



Overview

When the LOS LED blinks slowly, check whether the pigtail fiber is connected normally and whether the optical connector is contaminated. Every ONT is a little different, but the lights are almost always in the same spot. On most models — including the Langzhi L801, L880G, and L881G — you'll find the indicator lights on the front panel, usually with small icons or text labels underneath. Here are the lights you're most likely to see:. Huawei ONT LED indicators are the light-emitting diode (LED) status lights on Huawei Optical Network Terminals (ONTs), such as the EchoLife EG8145V5 and other GPON models deployed in fiber-optic broadband access networks. In the start-up process, the LOS. Added the one-click indicator blinking function to V500R023C00.
