Egypt QSFP-DD optical module PAM4

Overview

The Cisco's QDD-400G-VR4 Module (Figure 5) is a hot pluggable optical transceiver compliant with 400G Ethernet. The optical interface supports bit rates of 53. 25 Gbps/lane) and link reach up to 50m over OM4/OM5 MMF, 30m over OM3 MMF. To meet these increasing bandwidth and efficiency demands, QSFP28 PAM4 transceivers have emerged as a compact and cost-effective solution. By combining four-level pulse amplitude modulation (PAM4) with dense wavelength division multiplexing (DWDM) technology, these transceivers enable. The Cisco ® family of QSFP-DD modules provide the industry's highest bandwidth density while leveraging the backward compatibility to lower-speed QSFP pluggable modules and cables. The Cisco 400GBASE Quad Small Form-Factor Pluggable Double Density (QSFP-DD) portfolio offers customers a wide variety. Quad Small Form-Factor Pluggable Double-Density (QSFP-DD) offers twice as many high-speed electrical interfaces as QSFP28 while maintaining the same port density. Describes the chassis, power supply, fans, boards, optical modules, and power distribution box of the NetEngine 8000 M14K, M14, M8K, M8, M4, 8000E M14, M8.
