Fiber Optic Cable Splicing Test Platform

Overview

The Fiber Optic Splicing and Testing app helps teams test optical cables during procurement, installation, and maintenance to quickly identify and resolve defects. When a cabling system malfunctions, baseline measurements are essential for comparing against current test results. The OptiFiber Pro OTDR family is the first class of OTDRs that is built with features and usability for both the enterprise network engineers, and cable installers working in both. The CertiFiber® Pro Optical Loss Test Set (OLTS) helps cabling professionals accomplish more than ever. It's all about accurate, error-free certification, making jobs easier to manage and certifying fiber optic cabling to industry standards, faster. CertiFiber Pro OLTS complies with all applicable. Fiber optic laboratory testers provide accurate data on loss, performance, and signal quality, essential for developing, testing, and optimizing optical technologies.
