Fiber optic cable with PVC coating

Overview

PVC Compound can increase the mechanical strength and abrasion resistance of optical fiber cables, improving their tensile strength and durability, and reducing the rate of fiber damage during installation and use. Polyvinyl Chloride (PVC) Fiber Optic Cable Assemblies are available at Mouser Electronics. An optical cable structure protects optical fibers from environmental damage. It exhibits excellent processing performance and weather resistance, allowing for adjustments in material color, hardness, and other properties, and finds extensive. With polymethyl methacrylate as the core material, low refractive index and high transparent fluorine resin as the cladding, the whole fiber optic light cable is wrapped by a black PVC protective layer, end glow illuminated.
