Does fiber optic cable have a Barbados branch

Overview

Barbados has become the first island in the Caribbean to be fully wired by fiber optics, said FLOW, the regional subsidiary of telecommunications giant Cable & Wireless as it completed its fibre to the home (FTTH) network rollout. As a small island nation in the Caribbean Sea, Barbados has a well-developed telecommunications infrastructure. The Southern Caribbean Fiber (SCF) is a submarine cable of approximately 3000 km, connecting 15 islands in the Eastern Caribbean with 16 landing points: Trinidad, Grenada, St Vincent, Barbados, St Lucia, Martinique, Dominica, Baillif (Guadeloupe), Jarry (Guadeloupe), Antigua, Montserrat, St Kitts. The architecture of SCF is based on two main branches : The omnibus branch, which connects Trinidad to St-Croix and Puerto Rico, is a repeaterless system made up of submarine cable comprising 4 to 8 fiber pairs. This solution is based on Alcatel Submarine Networks technology. Country Manager Desron Bynoe says the foundation for the future has been laid and the new system will drive up value for the Barbadian community.
