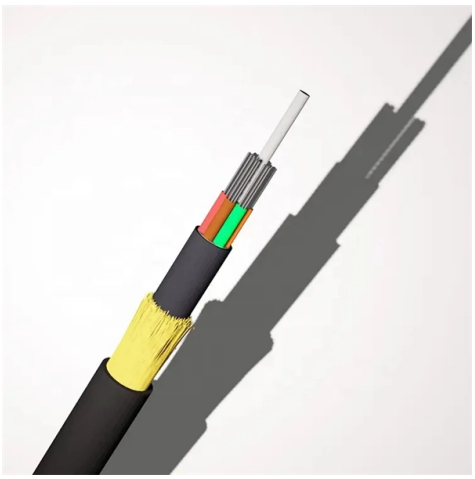
Fiber optic waterproof patch cord connector price



Overview

You gain latest optical fiber specifications, tracking top market trends, and direct wholesale access for competitive pricing. For industry-leading electrical buyers, submit an inquiry to check availability.

Key Takeaways

Waterproof fiber optic patch cords typically range from $20 to $200 per unit depending on length, fiber type, and connector configuration.

Price Overview

Waterproof fiber optic patch cords are available in various lengths and fiber types (singlemode or multimode), with prices influenced by connector type (LC, SC, FC, ST, E2000), armored or non-armored construction, and outdoor durability features. For example, OM3 outdoor waterproof patch cords with LC, SC, or FC connectors are sold on Amazon in lengths from 60m to 120m, with prices generally starting around $20–$50 for shorter lengths and increasing for longer or armored versions.

Wholesale and OEM Options

For bulk or customized orders, suppliers on platforms like Alibaba and Made-in-China offer factory-direct pricing, which can significantly reduce costs for large-scale projects. Prices vary based on fiber count, cable diameter, and protective features, and requesting a quote from OEM manufacturers is recommended for precise pricing.

Features Affecting Price

Armored or TPU jacketed cables: Provide enhanced protection against environmental hazards, rodents, and physical stress, increasing durability but also cost. Connector type and customization: LC, SC, FC, or hybrid connectors, as well as field-terminable options, can affect pricing. Length: Longer cables naturally cost more; typical outdoor lengths range from 10m to 120m or more.

Certifications and standards: ISO, UL, CE, and network access approvals may slightly increase cost but ensure reliability.

Practical Considerations

Shorter patch cords (1–10m) for outdoor waterproof use may cost $20–$50 per unit. Medium lengths (50–100m) typically range $50–$120, depending on fiber type and armor. Longer or fully armored cables (100–120m or more) can reach $150–$200 per unit.

Bulk orders or OEM customization can reduce per-unit cost, especially for industrial or telecom projects. When purchasing, consider environmental conditions, required fiber type, and connector compatibility to ensure the selected waterproof patch cord meets both performance and budget requirements.
