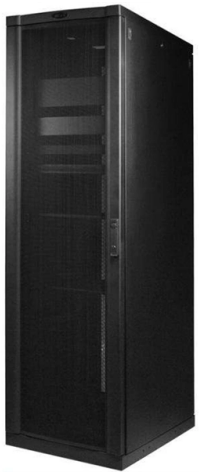
Multiple routers after fiber optic internet access



Overview

A common solution is to connect two routers on the same fibre optic line. In this article, Axarfusion will guide you through the steps to achieve this configuration and ensure that both routers work in harmony to give you a seamless browsing experience. " However, it's crucial to distinguish between the ONT's role (signal conversion) and the routing function (managing. It is indeed feasible to link two routers to one fiber modem and this arrangement can be advantageous, especially in cases of a multi-storeyed residence requiring more WiFi coverage or additional wired connectivity options. Connect the modem to the first router. However the real problem is how to create a balance, so assume room A is torrenting and taking up 90% of your internet bandwidth, then. Assume you have house with direct access to an optic fibre cable (FTTP). This setup has to be changed because the house will be. If you're looking to expand your Wi-Fi network or increase network coverage in your home or office, connecting one router to another is the perfect solution.
