Fireproof Ladder Type Cable Tray

Overview

Constructed with fire-resistant coatings and materials, this cable ladder ensures structural integrity under high-temperature conditions. Our GRP cable ladder systems are equipped with required fittings like tee sections, cross sections, internal and external bends of different degree (45o and 90 o), horizontal bends, couplers, anchoring, reducers and support systems. Supports customized certification as. Ensure your infrastructure's safety with NewReach Fire Rated Cable Trays that feature the proven FLAMMOTECT-A and DG-CR 0. The innovative solutions offer resistance to fire, creating protective barriers for your cables. Meka Pro has tested and continues to test its products and cable management systems´ fire resistance with the cables installed and connected according to the temperature curve in the EN 1363-1. Equipped with 10 CNC high-precision high-frequency automated production lines for fireproof electrical steel conduits and more than 120 auxiliary machines, combined with a regular stock of 5,000 tons of high-quality raw materials, enabling rapid response to order demands and ensuring an on-time. Cable trays are essential cable management systems designed to provide robust support and organized routing for electrical cables, data cables, and communication wiring in commercial, industrial, and residential applications.
