G6524 core optical cable

Overview

The 24-Core ADSS (All-Dielectric Self-Supporting) Optical Fiber Cable is an all-dielectric, self-supporting aerial fiber optic solution widely used in medium to long-distance telecom and power utility networks. The tubes are filled with a water-resistant filling compound. A Fiber Reinfor ed Plastic (FRP) locates in the center of core as a non-metallic strength member. The cable core is. Briticom™ offers a wide range of indoor and outdoor fibre optic distribution, patching and consumer cables – including Plenum, Riser and LSZH in all diameters. Briticom® The fibers, are positioned in a loose. This document outlines the specifications for a single-mode optical fiber and cable designed for use around the 1310 nm zero-dispersion wavelength, suitable for both the 1310 nm and 1550 nm regions, and compatible with analogue and digital transmission.
