ODMQSFP28 Optical Module SFP

Overview

UnitekFiber's QSFP28 100G-LR4 transceiver module supports transmission distance up to 10km over single-mode fiber with duplex LC connector. This article provides a comprehensive comparison of mainstream optical transceivers, including SFP, SFP+, QSFP+, QSFP28, and QSFP-DD. It explains their technical differences, compatibility considerations, and ideal use cases to help readers choose the right module for enterprise and data center. When this type of optical module is used to interconnect with a WDM device, the 1+1 protection switching duration on the client side of the WDM device is longer than 50 ms. The optical power calculation is based on the OMA value. 1G to 400G solutions for data centers & networks. Shop now!An SFP (Small Form-factor Pluggable) is a compact, hot-pluggable transceiver module that allows networking equipment — including switches, routers, servers, and media converters — to support different physical media, such as optical fiber or copper, without replacing the host hardware. This modular. A practical, engineer-friendly guide to choosing the right transceiver form factor by speed, port density, power, migration plan, and operational risk—built for 25G/100G networks in 2026. 25G SFP28 is the new access/server baseline; deploy it for port density and long-term value.
