Huijue Indoor Optical Cable Models

Overview

Indoor Fiber Optic Cables (GJBFJH/GJBFJV) are specifically designed for building interior fiber optic communication.

Key Takeaways

The Huijue indoor optical cable models are GJBFJH and GJBFJV, designed for building interior fiber optic communication.

Model Overview

Huijue indoor optical cables are available in the GJBFJH and GJBFJV series. These models are specifically designed for indoor use, such as in data centers, equipment rooms, and structured building cabling. They feature LSZH (Low Smoke Zero Halogen) jackets, which produce minimal smoke and no halogen during combustion, meeting indoor fire safety regulations.

Fiber Types and ConfigurationsSingle-mode fibers: G652D and G657AMultimode fibers: OM1, OM2, OM3, OM4Core configurations: Flexible, ranging from 2 to 288 coresCable types: Simplex and DuplexConstruction: Tight-buffered fibers for easy installation and low maintenance Key FeaturesIndoor suitability: Optimized for internal building cablingFlexible customization: Core count and fiber type can be tailored to project requirementsDurability: Lightweight, small diameter, and easy to handleHigh performance: Fast transmission, long-distance capability, and immunity to electromagnetic interference Additional NotesSome Huijue indoor cables, like the 8-core SM LSZH distribution cable, are designed for indoor distribution but can also be adapted for outdoor use with a PE tube.
