Fiber Optic Cable Price Chaos

Overview

The current fiber optic price explosion is primarily driven by a sudden, massive, and sustained spike in demand caused by the widespread military use of fiber-guided kamikaze drones (loitering munitions) and advanced FPV (First Person View) drones in ongoing conflicts, particularly. The current fiber optic price explosion is primarily driven by a sudden, massive, and sustained spike in demand caused by the widespread military use of fiber-guided kamikaze drones (loitering munitions) and advanced FPV (First Person View) drones in ongoing conflicts, particularly. From late 2025 through the first quarter of 2026, the global fiber optic cable market experienced one of the sharpest and most unexpected price surges in its history. 652D fiber, bend-insensitive G. 657A2 grades have all seen dramatic increases. Based on our observations and market communication with upstream suppliers, the single-mode fiber market in China has experienced an unprecedented price surge in the first two months of 2026. The price of bare fiber—the fundamental glass strand at the heart of every cable—has not just increased; it has surged unpredictably. This isn't typical market fluctuation; it's a perfect storm of global constraints. If you have sourced optical fiber g657 cables in the past month, you have likely encountered extended lead times, skyrocketing quotes, and the dreaded words: "out of stock.
