© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

In the electricity market in India, power can be traded between generators, distributors and large consumers through bilateral contracts or power exchanges. Bilateral contracts are negotiated between two parties and are often for long term, providing stable prices. Power exchanges allow electricity to be traded through collective transactions, where buy and sell bids are anonymously submitted and aggregated. The market is cleared based on supply-demand equilibrium, with the intersection of the d
