# Lc cold connector optical module

## Overview

The LC is a small-form-factor connector system for fibre optic cabling in telecommunications systems, data centres and LANs. This guide provides a fully updated and industry-ready overview of LC fiber optics, explaining the origin and design of LC connectors, their key features, and the complete ecosystem of LC-based products used in modern networking. It covers LC connectors, LC patch cables, uniboot designs, armored. The LC connectors and adaptors set the standard for small optical fibre interconnects. Even as 400G/800G parallel-optics and MPO-based high-density solutions grow, LC remains essential for 10G/25G/50G/100G/200G/400G duplex. The Lucent connector, commonly known as the LC connector, is a small form factor type of fiber optic connector used in high-density aerospace applications. Our portfolio includes a connector kit with a 1.
