Key Takeaways

Concealed electrical boxes in Malta are available as recessed enclosures or decorative cover frames, allowing safe and aesthetic integration of electrical panels into walls.

Types of Concealed Electrical Boxes

Recessed PV

C or metal boxes are designed to be mounted within walls or ceilings, with the front face flush with the surrounding surface. These are ideal for hiding wiring and small distribution units while maintaining a clean look. Typical dimensions are around 6 inches in depth, but sizes vary depending on the application and number of circuits.

Electrical distribution picture frame covers are another popular option. These covers conceal wall-mounted circuit breaker panels while providing easy access for maintenance. They are available in various sizes and styles, suitable for both residential and commercial interiors.

The covers combine functionality with aesthetics, offering a modern, professional finish without compromising safety. Materials and FeaturesPVC: Lightweight, corrosion-resistant, and easy to install, commonly used for recessed boxes. Metal: Provides durability and fire resistance, often used for larger or commercial panels.
