Proudly Serving the Industry for Over 40 Years! Cable Technology Laboratories, an independent low/medium/high voltage testing laboratory was first established in 1978. We at CTL are dedicated to the evaluation of wires, power cables, overhead cables, accessories, and other electrical equipment and. Medium voltage (MV) cables are the backbones of power distribution systems. Strictly speaking, MV cables are rated from 2kV to 35kV (phase-to-phase); the cables rated above 35kV are referred as sub-transmission and cables over 69kV are in transmission class. Although there are still some paper. IEEE Standards documents are developed within the IEEE Societies and the Standards Coordinating Committees of the IEEE Standards Association (IEEE-SA) Standards Board. The IEEE develops its standards through a consensus development process, approved by the American National Standards Institute. Cable and load testing is where theory meets the real world. This guide focuses on practical workflows built around three EleCalculator.
