Myanmar Air-blown Fiber Optic Cable

Overview

Air Blown Optical Fiber Cable BLOLITE is easily installed using compressed air and fibers are easy to terminate and are compatible with all standard optica.

Key Takeaways

Air-blown fiber optic cables in Myanmar are available through local manufacturers like Yadanarbon Fibre and international systems such as Leviton's BLOLITE and MICRBLO, offering flexible, reliable, and scalable fiber deployment.

Overview of Air-

Blown Fiber Optic TechnologyAir-blown fiber optic cables are designed to be installed in pre-laid ducts using compressed air, allowing fiber elements to be blown in as needed. This method provides flexibility for future network expansion, reduces installation risk, and supports long-distance links up to 1 km. Air-blown systems are compatible with standard optical connectors and are suitable for both internal and external applications, including backbone networks and fiber-to-the-desk connections.

Leviton's BLOLITE and MICRBLO systems are examples of widely used air-blown fiber solutions, known for high reliability and zero failure rates since 1988.

Local Suppliers and Manufacturers in Myanmar

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

Yadanarbon Fibre Co., Ltd: Established in 2009, it is a pioneer in Myanmar's fiber optic industry, offering fiber optic cabling, maintenance services, and ELV system solutions. They are located in Yadanarpon Cyber City, Pyin Oo Lwin, and provide project-based fiber optic solutions suitable for both commercial and industrial applications. Other Cabling Companies: Myanmar has a growing list of verified cabling and fiber optics companies, particularly in Yangon, offering fiber optic cables, patch cords, and installation services.

Online Suppliers: Platforms like Alibaba and ICT.com.mm list multiple fiber optic cable suppliers and distributors in Myanmar, including single-mode and multi-mode patch cords, which can complement air-blown fiber systems.

Advantages of Air-

Blown Fiber in MyanmarScalability: Fibers can be added or replaced without major civil works. Reduced Downtime: Pre-installed ducts allow network upgrades without disrupting existing services. Cost Efficiency: Minimizes labor and installation costs over time, especially for expanding networks.

Reliability: Proven systems like BLOLITE have decades of operational success in demanding environments. ApplicationsAir-blown fiber optic cables are ideal for: Enterprise networks and office buildingsData centers and IT campusesAirports, hospitals, and industrial facilitiesLong-distance backbone links within cities or campusesConclusionFor Myanmar, air-blown fiber optic systems provide a modern, flexible solution for expanding fiber networks. Local manufacturers like Yadanarbon Fibre supply the necessary infrastructure and services, while international systems such as Leviton's BLOLITE and MICRBLO offer proven technology for reliable, scalable deployment.

These systems are particularly advantageous for projects requiring future-proofing and minimal disruption during network upgrades.

Article Content

Air Blown Optical Fiber Cable

BLOLITE is easily installed using compressed air and fibers are easy to terminate and are compatible with all standard optical connectors. BLOLITE is extremely reliable, with a zero failure rate since the

Air Blown Fiber Systems

Air Blown Fiber Systems use air to blow micro optical fiber cables through pre-installed microducts.Air blowing fiber, also known as jetting fiber, is an efficient

Yadanarbon Fiber Co., Ltd.

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

Yadanarbon Fibre Co., Ltd was established in 2009 as the pioneer of fiber optic cable manufacturer in Myanmar. It is located in Yadanarpon Cyber City, Pyin Oo Lwin, Myanmar.

Fiber Optic Cable Manufacturer & Supplier In China

Independent Research And Production Of Optical Cables ZTO Fiber Optic Cable Company is a national high-tech enterprise specializing in the

GL FIBER

GL FIBER Is a China TOP 10 Air Blown Fiber Cable Manufacturer & Provider, Our Mini Fiber Units EPFU hot selling in European market, and Asian countries such

Air Blowing Micro fiber Optic Cable

Overview: The air blowing micro fiber optic cable is designed for microduct installation using air-blown technology. It offers compact size, excellent flexibility, and high-performance optical

MDEG | Myanmar Development Engineering Group Co., Ltd.

As technology improves, more and more companies and organizations are getting fiber optic cables. Not only will you save money over copper wires, but they''re also easier to install and take up less space.

Quality Air Blown Optic Cable & Air Blown Micro Cable factory from

This type of optical cable is mainly used for FTTH which has the characteristics of small diameter, light weight and excellent air blowing performance. In various comparison tests with products of world

Fiber Blowing Technology Explained

Air blown fiber installation uses a combination of pulling force, compressed air propulsion, and the mechanical thrust of the cable blowing machine to efficiently insert fiber optic cables into

Fiber Optical Micro Air Blown Cable

Discover the cutting-edge technology of Micro Air Blown Cable, a pivotal innovation in the telecommunications industry that Fibconet proudly offers.

Whitepaper Guide to air blown cabling systems

The earliest known version of blown fiber cable (using compressed air to push fiber cabling through tubes) is credited to Willem Griffioen of KPN Research, a Dutch landline and mobile

What are the advantages of air blown fiber optic cable technology in ...

© 2026 KENHARDT OPTICAL NETWORKS - All rights reserved

Air blown fiber optic cable technology offers significant advantages in complex terrain deployment, specifically in the following aspects:High Construction Efficiency:Air blown fiber optic

Introduction to Air Blown Optical Cable

Air Blown Optical Cable offers a revolutionary approach to optical fiber installation, providing numerous advantages over traditional cables. In this article, we will explore the concept of

eABF Enterprise Air-Jetted fiber optic cable | AFL Global

AFL eABF Air-Blown Fiber Optic Cable with six up to 72 fibers in a custom cable package that allows long-distance jetting into micro-ducts with inside diameters

Air Blown Fiber Optic Cable Solution And Manufacturer

HOC is one of the largest fiber optic cable companies in China. Whatever air blown fiber optic cables you are looking for, we can make it. Get a quote today.

Air-Blown Micro Fiber Optic Cables: Types, Structures, and Applications

From EPFU to GCYFY, discover all types of air-blown micro cables for indoor, outdoor, and last-mile FTTH fiber deployments with microduct systems.

What is an Air Blowing Micro Fiber Optic Cable: The

Air blowing micro fiber optic cable has revolutionized the way fiber optic networks are deployed worldwide, especially in FTTH (Fiber to the Home),

Fiber Blowing Solutions: A New, Efficient and Flexible

Discover the benefits and practical steps of air-blown fiber optic cable solutions. Learn how air-blown fiber compares to traditional installations and how
