Relay Protection Phase Test Standard

Overview

The IEEE standard for protection relays refers to a collection of guidelines developed by the Institute of Electrical and Electronics Engineers. These standards define the performance, accuracy, reliability, and. Standardisation is a tool that will ensure your improvements will be sustained. This identified a need for revising some of the existing standards and. Compact relay test set for quick and easy manual three-phase testing Ultra-portable test set for primary and secondary injection, as well as basic protection tests Modular, multi-phase protection relay test set and commissioning tool Compact relay test set for quick and easy manual three-phase. The purpose of this Standard Work Practice (SWP) is to standardise and describe the method for testing of Ergon Energy protection relays for commissioning purposes. This SWP should be interpreted in conjunction with Standard for Substation Protection (V1.
