Single-mode pigtail outer sheath

Overview

The color of the outer sheath of the multimode fiber pigtail is orange,aqua,red or green, the wavelength is 850nm, It is used for short-distance connection, and the color of the outer sheath of the single mode fiber pigtail is yellow, the wavelength is 1310m or. The color of the outer sheath of the multimode fiber pigtail is orange,aqua,red or green, the wavelength is 850nm, It is used for short-distance connection, and the color of the outer sheath of the single mode fiber pigtail is yellow, the wavelength is 1310m or. Fiber pigtail refers to a half-jumper-like connector used to connect fiber and fiber couplers. It includes a jumper connector and a length of fiber. SEESUO can supply FTTH drop cable pigtails which are made from standard FTTH drop cables. Fiber pigtail are divided into single mode and multimode fiber pigtail, which can be distinguished by color, wavelength and transmission distance. The color of the primary coating is the same as the color of the secondary coating. Need help?
