Six-core single-mode indoor optical cable model

Overview

Micro Armor FiberTM The Original Stainless Steel Armor SingleMode 6 Core OS2 Armored Indoor/Outdoor Plenum Fiber Optic Cable Model # TF6-OS2-PLO.

Key Takeaways

A six-core single-mode indoor optical cable is designed for high-speed, long-distance data transmission within buildings, featuring tight-buffered fibers, flame-retardant jackets, and compliance with OS2 standards.

Key Specifications

Fiber Type: Single-mode (SM), 9/125 µm core/cladding diameter, optimized for 1310nm and 1550nm wavelengths. Core Count: 6 fibers, suitable for small to medium indoor networks or campus links. Buffering: Tight-buffered design (typically 0.

9mm), providing mechanical protection and ease of termination. Jacket Material: LSZH (Low Smoke Zero Halogen) or flame-retardant PVC, often with a thickness of 0. 8–1.

5mm for indoor safety. Reinforcement: Multi-strand aramid yarn or stainless steel spiral for tensile strength and durability. Outer Diameter: Typically 4.

8mm, lightweight and flexible for indoor routing.

Performance and Applications

Transmission Distance: Supports long-distance indoor runs, often up to 10 km depending on equipment and wavelength. Installation: Suitable for vertical risers, cable trays, and elevator shafts; tight-buffered fibers simplify splicing and connectorization. Safety: LSZH or flame-retardant jackets prevent flame propagation and reduce toxic smoke in case of fire.

Use Cases: Ideal for FTTH, CCTV networks, data centers, campus networks, and telecommunication backbones.

Selection Considerations

When choosing a six-core single-mode indoor cable, consider: Route Environment: Indoor-only vs indoor/outdoor sections; select jacket and reinforcement accordingly. Connector Plan: Determine termination type (SC, LC, etc.) and splicing requirements. Testing Requirements: Ensure compliance with optical loss, attenuation, and bandwidth standards.

Project Specifications: Confirm distance, core count, and compatibility with existing network equipment. Quality and Compliance: Look for ITU-T G. 657.

A1 compliance, UL rating, and RoHS certification for safety and performance.

Summary

A six-core single-mode indoor optical cable provides a compact, durable, and high-performance solution for indoor fiber networks. Its tight-buffered fibers, flame-retardant jacket, and reinforcement make it suitable for structured cabling, riser installations, and high-speed data transmission, while careful selection ensures compatibility with project requirements and safety standards.
